Updated:	2013-09-14	Due date:	
TYPO3 Version:	4.6		
PHP Version:	5.3		
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	1-2-3 Installer incorrectly reports database selection error		
Description			
<p>While running though some installation tests, I tried to let the 1-2-3 installer create a database called "typo3-466".</p> <p>I assume the "-" is an illegal character in a MySQL database name. Using it definitely causes the installer to (incorrectly) report:</p> <p>No database selected</p> <p>I did select a database, so the error is confusing and misleading.</p>

History

#1 - 2013-09-14 22:35 - Christian Kuhn

- Status changed from New to Resolved
- Target version set to 6.2.0
- % Done changed from 0 to 100
- Is Regression set to No

The chosen database name is better sanitized in 6.2 install tool.
