## TYPO3.Fluid - Bug # 35090

Status: Resolved Priority: Should have

Author: Adrian Föder Category:

Created: 2012-03-21 Assigned To: Adrian Föder

**Updated:** 2013-07-30 **Due date:** 

**Has patch:** Yes **Affected Flow version:** Git master

**Subject:** base64-encode of URI-transferred serialized objects

### Description

At least Fluid-Widgets add a serialized object to links in order to transfer them across requests.

Maybe it's considerable to base64-encode these serialized objects to avoid problems like the

[[FLOW3:Installation\_hints#Unexpected-behavior-with-serialized-objects-in-request-arguments|suhosin's null-byte-omission]].

Additional explanation: serialized objects contain NULL bytes if a property of the object is protected.

[BUGFIX] Base64-encode widget context

In order to avoid various null-byte-issues as they occur when serializing an object with protected members (see [1]); for example with Suhosin or some reverse proxy implementations; the context object is transferred in a Base64 encoded state now.

As there is no need to urlencode it anymore, this additionally saves some bytes.

Mh, base64 encoding sounds a bit "expensive" to me, but I can't really judge this atm. I unassign myself for now so someone else can comment on this

another reason would be that, apparently, the Pound (<a href="http://linux.die.net/man/8/pound">http://linux.die.net/man/8/pound</a>) does also not support NULL bytes in URIs: <a href="http://www.apsis.ch/pound/pound">http://www.apsis.ch/pound/pound</a> list/archive/2012/2012-07/1341212883000/index <a href="http://www.apsis.ch/pound/pound/">http://www.apsis.ch/pound/</a> list/archive/2012/2012-07/1341212883000/index <a href="http://www.apsis.ch/pound/">http://www.apsis.ch/pound/</a> list/archive/2012/2012-07/1341212883000/index <a href="http://www.apsis.ch/pound/">http://www.apsis.ch/pound/</a> list/archive/2012/2012-07/1341212883000/index <a href="http://www.apsis.ch/">http://www.apsis.ch/</a> list/archive/2012/2012-07/1341212883000/index <a href="http://www.apsis.ch/">http://www.apsis.ch/</a> list/archive/2012/2012-07/1341212883000/index <a href="http://www.apsis.ch/">http://www.apsis.ch/</a> list/archive/2012/2012

### #4 - 2013-07-12 16:42 - Adrian Föder

- Category set to MVC
- Status changed from New to Accepted
- Assigned To set to Adrian Föder

#### #5 - 2013-07-12 16:48 - Adrian Föder

- Project changed from TYPO3.Flow to TYPO3.Fluid
- Category deleted (MVC)

#### #6 - 2013-07-12 16:52 - Adrian Föder

- Subject changed from Evaluate base64\_encoding of URI-transferred serialized objects to base64-encode of URI-transferred serialized objects

#### #7 - 2013-07-12 16:56 - Adrian Föder

as a side note, the URI length w/o base64 encoding, resulting in the need to urlencode it, is 546 bytes; where the base64 encoded variant is 516 characters long.

## #8 - 2013-07-12 17:12 - Gerrit Code Review

- Status changed from Accepted to Under Review

Patch set 1 for branch master has been pushed to the review server.

It is available at <a href="https://review.typo3.org/22264">https://review.typo3.org/22264</a>

## #9 - 2013-07-15 13:21 - Adrian Föder

- Tracker changed from Task to Bug
- Has patch changed from No to Yes
- Affected Flow version set to Git master

changed to Bug because the current behavior will definitely break for the mentioned circumstances (using Suhosin)

## #10 - 2013-07-15 13:23 - Gerrit Code Review

Patch set 2 for branch master has been pushed to the review server.

It is available at <a href="https://review.typo3.org/22264">https://review.typo3.org/22264</a>

# #11 - 2013-07-30 15:37 - Adrian Föder

- Status changed from Under Review to Resolved
- % Done changed from 0 to 100

Applied in changeset commit:f53ee1c679c828874d5ffec565b6eb202ade9040.
