| Description 1PHP Warning: Missing argument 2 for extDirect_DataProvider_BackendUserSettings::addToList() 2in /home/phil/t3-playground/t3-git/t3lib/extjs/dataprovider/class.extdirect_dataprovider_beusersettings.php line 107 This happens if I try to save a content element with a inline relation from the test extension from #27957. The reason is that the function processRpc in class.t3lib_extjs_extdirectrouter.php does 1return call_user_func_array(2array(\$endpointObject, \$singleRequest->method), 3is_array(\$singleRequest->data) ? \$singleRequest->data : array() 4); is called with \$singleRequest->data being just array(0 => 'tcaTrees.731c5105a19f1cd75f62dd10f39355b1'). I'll attach the raw json data. | | | | | | | | |

The json file actually contains three parameters for data.

Ok, some more info, maybe it helps.

The exception happens at \$index = 111 which would be this entry:

```
1{"action":"ExtDirect","method":"addToList","data":["tcaTrees.731c5105a19f1cd75f62dd10f39355b1",0,"
4f512819cab1c83f0747fa5a12c50996a64133a8"],"type":"rpc","tid":3070}
```

Notice that there are no quotes around the second parameter of the data array. In all other lines, quotes do exist.

Also the last line is only

```
1{"action":"ExtDirect","method":"addToList","data":["tcaTrees.731c5105a19f1cd75f62dd10f39355b1","
4f512819cab1c83f0747fa5a12c50996a64133a8"],"type":"rpc","tid":3071}
```

Here the second parameter is missing it all.

Same as <http://forge.typo3.org/issues/31978> ?

#4 - 2012-08-27 23:11 - Philipp Gampe

I guess.

- Status changed from New to Closed
- Is Regression set to No

seems to be a duplicate
