

## TYPO3.Flow - Bug # 3529

<b>Status:</b>	Resolved	<b>Priority:</b>	Must have
<b>Author:</b>	Karsten Dambekalns	<b>Category:</b>	MVC
<b>Created:</b>	2009-06-01	<b>Assigned To:</b>	Karsten Dambekalns
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Affected Flow version:</b>			
<b>Subject:</b>	Detection of new objects in argument handling fails		
<b>Description</b>			
<p>The symptom is #1237305720: Argument "newBlog": Querying the repository for the specified object was not successful.</p> <p>When looking closer it turns out that on the first error all is well, but when submitting a second time, the exception is thrown. The reason is, that we rely on a new object to not have an UUID. But with the resolution of #3477 all entities get an UUID upon creation - boom.</p>			

### History

#### #1 - 2009-06-02 00:08 - Karsten Dambekalns

Possible fix: instead of the pointcut on <Entity>::\_\_construct() use @within RepositoryInterface and method(add()) - then check the method argument, modify if needed.

#### #2 - 2009-06-02 10:41 - Karsten Dambekalns

- Status changed from New to Accepted
- Assigned To set to Karsten Dambekalns
