

TYPO3.Flow - Bug # 3532

Status:	Resolved	Priority:	Should have
Author:	Tim Eilers	Category:	Package
Created:	2009-06-01	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Package Manager creates new packages at wrong location		
Description			
<p>(The used OS was Debian Lenny)</p> <p>Perhaps i did something wrong, but i just followed the instructions of the Welcome package and entered</p> <pre>./flow3 package create MyPackage</pre> <p>I expected my package somewhere under the Packages subfolder, but it was created at / (/MyPackage/).</p> <p>If it is works-as-designed please close this bug, but point me to the option where i can control the folder where the package will be created.</p> <p>If it is a bug it should be fixed and create a package in the Local subfolder of the Packages subfolder.</p>

FLOW3:

- if no Local path for packages exists, createPackage() now throws an exception, refs #3532

History

#1 - 2009-06-02 00:12 - Karsten Dambekalns

Works here (MacPorts) with latest code (as of **now**):

```
kmac:flow3 karsten$ ./flow3 package create MyPackage
./Public/index.php FLOW3 Package Manager create --package-key=MyPackage
New package "MyPackage" created at "/Users/karsten/Sites/flow3/Packages/Local/MyPackage/".
kmac:flow3 karsten$ ls -l
total 32

#2 - 2009-06-02 00:30 - Tim Eilers

I just made a fresh and brandnew checkout (just to be sure) and it did not change, still wrong path.

#3 - 2009-06-02 09:36 - Tim Eilers

I found the Bug:

The package is only created at the right location if there is a "Local" path under "Packages". It isnt there in a distribution check out at the moment.

#4 - 2009-06-02 09:40 - Robert Lemke

- *Status changed from New to Accepted*

- *Assigned To set to Karsten Dambekalns*

#5 - 2009-06-02 10:56 - Karsten Dambekalns

- *Status changed from Accepted to Resolved*

- *% Done changed from 0 to 100*

Fixed as of r2515 by adding the Local folder.
