TYPO3.Flow - Feature # 35388

Status:	New	**Priority:**	Could have
Author:	Julian Wachholz	**Category:**	I18n
Created:	2012-03-30	**Assigned To:**	
Updated:	2013-12-03	**Due date:**	
PHP Version:	5.3		
Has patch:	No		
Complexity:			
Subject:	Use the current package as default for translations within controllers		
Description			

The Translator::getTranslationBy* should use the current package to determine where to get the translation from, just like the TranslationViewHelper in Fluid does.

Currently it's quite tedious since the packageKey is the very last argument to those methods and you rarely need the other ones in between.
