

TYPO3.Neos - Bug # 35736

Status:	Resolved	Priority:	Must have
Author:	Christian Müller	Category:	
Created:	2012-04-06	Assigned To:	Christian Müller
Updated:	2012-08-31	Due date:	
Subject:	Fix Handling of CurrentNode		
Description			
<p>The context holds a currentNode property which is set in the TYPO3.TYPO3 NodeController and used in Typoscript rendering. This is dangerous as the context is not a singleton and can be overridden due to treatNodesWithContext() for example in link generation. After that the currentNode is lost. I would propose to move the currentNode and possible other information about the current rendering into a singleton (NodeRenderingEnvironment tbd.) to prevent it being lost.</p> <p>The change: https://review.typo3.org/#/c/10173 is a quick fix for the Quebec site to circumvent the problem but shouldn't be merged (or just as a temporary solution)</p>

[BUGFIX] Change Context behavior to avoid mixed context

With this change the context is derived from the node repository instead from each node, to avoid mixing up contexts during the rendering process.

Fixes: #35736
