

## TYPO3.Flow - Feature # 3580

<b>Status:</b>	New	<b>Priority:</b>	Must have
<b>Author:</b>	Robert Lemke	<b>Category:</b>	MVC
<b>Created:</b>	2009-06-05	<b>Assigned To:</b>	
<b>Updated:</b>	2011-10-13	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Subject:</b>	Create an administration panel for the FLOW3 Development context		
<b>Description</b>			
<p>We need some kind of admin panel which is (can be) displayed on the page rendered by FLOW3 and provides some useful information to the developer. That could be:</p> <ul style="list-style-type: none"><li>- Information about caches, ability to flush certain caches</li><li>- Information about routing (which route matched etc.)</li><li>- Memory consumption / parse time</li><li>- Tail of certain logs ?</li></ul> <p>The graphical design and code architecture should allow for third party packages to plugin to the panel for providing custom functionality.</p> <p>Before this ticket can be close we need (solved in separate tickets - please create some):</p> <ul style="list-style-type: none"><li>- A UI concept and after that, an actual design</li><li>- A rough concept for the implementation</li><li>- The actual implementation</li></ul>			

### History

#### #1 - 2009-06-05 10:33 - Robert Lemke

- Target version set to 283

#### #2 - 2009-07-13 11:25 - Robert Lemke

- Target version deleted (283)

#### #3 - 2011-09-29 13:36 - Christopher Hlubek

We should also add security debugging information, since this is all very hidden right now.

The question is, if we also show this panel when an exception occurred.

#### #4 - 2011-10-13 15:21 - Christian Müller

didn't see this ticket so created:

<http://forge.typo3.org/issues/30890>

with the ideas.

I would use Phoenix styles as first rough idea on design and try to prepare some mockups soon.
