TYPO3.Flow - Feature # 35826

Status:	Resolved	**Priority:**	Should have
Author:	Robert Lemke	**Category:**	Cache
Created:	2012-04-10	**Assigned To:**	Robert Lemke
Updated:	2012-04-11	**Due date:**	
PHP Version:	5.3		
Has patch:	No		
Complexity:	medium		
Subject:	Force option for flushing caches in edge cases		
Description			

Sometimes packages containing invalid PHP code which cause fatal errors can prevent FLOW3 from flushing code caches with ./flow3 typo3.flow3:cache:flush, because reflection data is loaded or created before the command can be executed. For these cases a --force option would be helpful which skips all non-essential initialization and flushes caches directly, including emptying the whole temporary directory.

[FEATURE] --force option for flow3:cache:flush

Packages containing invalid PHP code which cause fatal errors
can prevent FLOW3 from flushing code caches with
./flow3 typo3.flow3:cache:flush

This patch provides a new --force option which skips all non-
essential initialization and flushes caches directly, including
emptying the whole temporary directory.
