

Core - Bug # 35844

Status:	Closed	Priority:	Should have		
Author:	4m	Category:	DBAL		
Created:	2012-04-11	Assigned To:			
Updated:	2015-01-23	Due date:			
TYPO3 Version:	4.5				
PHP Version:					
Complexity:					
Is Regression:	No				
Sprint Focus:					
Subject:	Introductory package is not being installed if using PostgreSQL DBMS				
Description					
<p>I wasn't sure where to put this, so I decided putting it here because it is clearly a problem in the PgSQL integration.</p> <p>In both versions 4.6.4 and 4.7.0b3, the introductory package is not being installed if using a PgSQL DBMS. These versions were tested on two completely unrelated linux servers, running Debian and Ubuntu.</p> <p>There is no particular error message appearing upon installation of TYPO3, so either the Installer isn't checking for the successful installation of the package or it isn't doing any error reporting.</p>

- Status changed from New to Closed

- TYPO3 Version set to 4.5

- Is Regression set to No

we will continue in the Epic, because I think 99% of the reports can be drilled down to the same reasons.
