Subject:	Give hint in exception message about aggregate roots in class hierarchies		
Description			

The message "In a class hierarchy either all or no classes must be an aggregate root, "<foo>" is one but the parent class "<bar>" is not." should give a hint on how to solve this.

[TASK] Give hint with exception on aggregate roots in hierarchies

The message "In a class hierarchy either all or no classes must be
an aggregate root, "Foo" is one but the parent class "Bar" is not."
is not really helpful for developers.

This change adds a hint on how to solve the problem.
