Has patch:			
Subject:	Alias view helper for setting template variables		
Description			
There should be an alias view helper that can set variables in the template.			
The following use cases should be supported:			
<pre><f:alias value="{foo.bar.baz}" as="x"> {x.name} </f:alias> <f:alias map="{x: foo.bar.baz, y: foo.bar.baz.name}"> {x.name} or {y} </f:alias></pre>
