TYPO3.Flow - Feature # 35965

Status:	Resolved	Priority:	Should have
Author:	Peter Russ	Category:	Security
Created:	2012-04-13	Assigned To:	Andreas Förthner
Updated:	2012-05-08	Due date:	
PHP Version:			
Has patch:	No		
Complexity:	easy		
Subject:	Session shouldn't start automatically		

Description

By default session handling is started automatically. This isn't useful when it comes to server/server communication.
Places where it should be fixed:
TYPO3\FLOW3\Security\Authentication\AuthenticationProviderManager line 130   * @FLOW3\Session(autoStart=true)
and
Package line 46/47
$dispatcher->connect('TYPO3\FLOW3\Security\Authentication\AuthenticationProviderManager', 'authenticatedToken',
'TYPO3\FLOW3\Session\SessionInterface', 'renewId');
$dispatcher->connect('TYPO3\FLOW3\Security\Authentication\AuthenticationProviderManager', 'loggedOut',
'TYPO3\FLOW3\Session\SessionInterface', 'destroy');

Revision ab61bd44 - 2012-05-07 14:56 - Andreas Förthner

[!!!][TASK] Change session autostart handling for authentication providers

The session autostart annotation is set at the
providers, not at the authentication manager. By
this every provider can decide on its own, if a
session is needed or not.

Also adds a safeguard in the Session Logging Aspect
to prevent errors while trying to log renewId()
even though the session was not started yet.

Releases: 1.1
Resolves: #35965

Revision 69c5912c - 2012-05-08 09:08 - Robert Lemke

[BUGFIX] Assure fresh session for functional tests

The changes done to resolve #35965 came with a functional
test that worked fine when run in isolation but failed when
run with other tests that would start a session.

This patch moves the $session->destroy() call in the
base test case from the tearDown() to the setUp()

method and fixes the behavior of destroy() in the
TransientSession which did not reset the "started"
flag.

Revision a2033af0 - 2012-05-08 09:59 - Karsten Dambekalns

[BUGFIX] Adjust TransientSession unit test to recent change

The change in TransientSession to close the session when destroy()
is called needed to be reflected in the unit test.

Just for the record: it's not correct that sessions are generally started automatically - the "autostart" feature exists exactly for having more control over
that behavior. What's right though is that the authenticate() method is starting a session because I did not consider authentication mechanisms which
don't need sessions.
