

TYPO3.Flow - Bug # 36013

Status:	Closed	Priority:	Should have
Author:	Jacob Floyd	Category:	Command
Created:	2012-04-14	Assigned To:	
Updated:	2012-04-19	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version:	Git master		
Subject:	Uncaught Exception on package:(de)activate when package is already (de)activated or not specified.		
Description			
<p>Try to activate a package that is already active, like TYPO3.FLOW3 or TYPO3.Fluid</p> <pre>./flow3 package:activate TYPO3.FLOW3</pre> <p>FLOW3 should say something like "Package is already active", but instead it throws an "Uncaught Exception" with pretty useless information:</p> <pre>Uncaught Exception</pre> <p>More Information</p> <pre>Exception code #0 File [snip]Cache/Code/FLOW3_Objekt_Klassen/TYPO3_FLOW3_Cli_CommandController_Original.php line 249 Exception reference #201204413235602f31b8f</pre> <p>The same exception occurs if you deactivate an already deactivated package.</p> <p>If you don't specify the package to activate with <code>./flow3 package:activate</code>, you get the same fairly useless error message (only it cites line 172 instead of 249).</p>

- Status changed from New to Closed

This was a problem with the Cli handling of errors (happened on all Cli errors) and is fixed in master.
