

TYPO3.Flow - Bug # 36030

Status:	Resolved	Priority:	Should have
Author:	Alexander Stehlik	Category:	Command
Created:	2012-04-14	Assigned To:	
Updated:	2012-04-15	Due date:	
PHP Version:			
Has patch:	No		
Complexity:	easy		
Affected Flow version:	Git master		
Subject:	Forwarding of CLI requests throws an exception		
Description			
When you call a CLI action with missing parameters you get an exception with no further explanation.			
This is because TYPO3\FLOW3\Cli\CommandController::forward() throws a TYPO3\FLOW3\MVC\Exception\StopActionException that is not caught anywhere.			
Expected behaviour would be to catch the exception and try do process a new request.

Revision f9847d2b - 2012-04-14 15:17 - Alexander Stehlik

[BUGFIX] Fixed empty exception for CLI commands

When issuing an invalid command line (missing or wrong arguments), FLOW3 displayed an exception #0 without further explanation. The reason was an uncaught StopActionException thrown in the CommandController::forward() method.

This patch fixes that bug and additionally eliminates some duplicate code in CommandRequestHandler.

Fixes: #36030

Releases: 1.1

Change-Id: Ie4b42b63010890befd94f1df2f199c03d6b82197
