TYPO3.Flow - Bug # 36114

Status:	Resolved	**Priority:**	Must have
Author:	Johannes K	**Category:**	Http
Created:	2012-04-15	**Assigned To:**	Bastian Waidelich
Updated:	2012-04-26	**Due date:**	

PHP Version:	
Has patch:	No
Complexity:	medium
Affected Flow version:	Git master
Subject:	Property Mapping breaks for file uploads, because $_FILES-Array doesn't get "untangled" anymore

Description

TYPO3\FLOW3\Http\Request is missing the functionality that is implemented in
TYPO3\FLOW3\Utility\Environment::untangleFilesArray().

This causes the $source array in TYPO3\FLOW3\Property\PropertyMapper::convert() to have invalid keys from the $_FILES array
(name, type, tmp_name, error, size) and causes this exception:
"#1297759968: Exception while property mapping at property path "": Property "name" was not found in target object of type
Acme\Domain\Model\Event".

This is how $source look like:

```
array(15)
 '__identity' (10) => '3fbe7e6e-15dc-43af-93d5-6b6e173a58c4' (36)
 'title' (5) => 'Test' (8)
 ...
 'image' (5) => array(1)
  'resource' (8) => array(1)
   'submittedFile' (13) => array(2)
    'fileName' (8) => '' (0)
    'resourcePointer' (15) => '' (0)
 'name' (4) => array(1)
  'image' (5) => array(1)
   'resource' (8) => '' (0)
 'type' (4) => array(1)
  'image' (5) => array(1)
   'resource' (8) => '' (0)
 'tmp_name' (8) => array(1)
  'image' (5) => array(1)
   'resource' (8) => '' (0)
 'error' (5) => array(1)
  'image' (5) => array(1)
   'resource' (8) => integer 4
 'size' (4) => array(1)
  'image' (5) => array(1)
   'resource' (8) => integer 0
```

[BUGFIX] Uploaded files are not untangled anymore

TYPO3\FLOW3\Http\Request is missing the functionality that is implemented
in TYPO3\FLOW3\Utility\Environment::untangleFilesArray().

This causes the $source array in
TYPO3\FLOW3\Property\PropertyMapper::convert() to have invalid keys from
the $_FILES array (name, type, tmp_name, error, size) which causes an
exception.
