Subject:	Live search result shows titles and icons of live elements when in draft workspace				
Description					
The panel with results that folds down when searching in the top right corner shows the icons and titles of the live records instead of the draft records when in working a draft workspace.

History

#1 - 2012-06-11 13:06 - Bart Dubelaar

Additionally, the live search only searches in live elements. Searching on the uid of a draft element is not possible. This is a pity because it would be very useful when searching for referred records that are listed in the reference listing of a record. This list will show the uids of draft records if any references to draft elements exist.
