Subject:	When working in a draft workspace the path displayed is the live path.		

Description
Maybe changing the label to 'live path' will do. But right now, the path shown in the upper right can be entirely different from the path in the pagetree. Holds for 4.5 and up.

Hi,

as this issue is very old. Does the problem still exists within newer versions of TYPO3 CMS (6.2.9)?

I will install the latest TYPO3 version and check it. Will follow up later.

- Status changed from Needs Feedback to New

- TYPO3 Version changed from 4.7 to 6.2

Still an issue with 6.2.12: see attached file: the page "my page 3" has been renamed in workspace "my page 3vvvv"; nonetheless, in upper right "path" the path remains the live path.
