TYPO3.Flow - Bug # 36495

Status:	New	**Priority:**	Should have
Author:	Alexander Berl	**Category:**	Persistence
Created:	2012-04-24	**Assigned To:**	
Updated:	2012-04-24	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git master			
Subject:	HTTP Response is sent before persistence preventing Exceptions to be displayed on redirect		
Description			

When a persistence Exception (e.g. *"Integrity constraint violation: 1048 Column '...' cannot be null"* due to missing *@ORM\Column(nullable=true)* annotation) is thrown after an action that does a redirect (e.g. a typical createObjectAction), the Exception isn't displayed (well it is but only for the matter of milliseconds the browser needs to do the redirect) because the redirect headers are sent before.

Therefore the Exception may go by unnoticed until the persistence is checked and Exception log inspected, which is undesired.
