<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Subject:</b>	Firewall Redirect?		
<b>Description</b>			
<p>I want to implement somewhere some assumptions wich has to be valid to access some actions. For Example: If primaryElectronicAddress::approved is false init a redirect to somewhere else. I tried to to this by firewall but the firewall doesnt catch something to redirect.</p> <p>Maybe the firewall is the wrong place here. Maybe there shoud be something wich acts nearly like a firewall but call it TYPO3\FLOW3\Assumption\ wich holds some pattern stuff f.e. to redirect?</p>
