[TASK] Improve "compilation error message"

When the compile run failed, an exception was thrown until now. This lead to confusing output. With this change it doesn't output useless PHP version info etc. anymore.

Change-Id: I621e3bf5d6dbfde98c53e50b94a9e6b6cdfd74

Resolves: #36562

Releases: 1.1

- Status changed from New to Accepted

#2 - 2012-04-25 17:57 - Gerrit Code Review

- Status changed from Accepted to Under Review

Patch set 1 for branch **master** has been pushed to the review server.

It is available at <http://review.typo3.org/10761>

#3 - 2012-04-26 02:38 - Karsten Dambekalns

- Status changed from Under Review to Resolved

- % Done changed from 0 to 100

Applied in changeset commit:9539aca721deb3bf54c6188612e9e3e0f923856.

#4 - 2013-03-24 10:27 - Henrik Møller Rasmussen

Would it be possible to improve the error message on compile run errors?

A couple of times I have been getting cryptic errors from the compile run, with no info about where to start searching for the problem. There is no info in the log either.

It have happened on syntax errors and on use of non-existing classes. Fx. I extended a class from a package that was not installed on the production system.
