

## TYPO3.Fluid - Bug # 3657

<b>Status:</b>	Resolved	<b>Priority:</b>	Should have
<b>Author:</b>	Marcel Rosenberger	<b>Category:</b>	
<b>Created:</b>	2009-06-14	<b>Assigned To:</b>	Bastian Waidelich
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>Has patch:</b>			
<b>Affected Flow version:</b>			
<b>Subject:</b>	<f:form.select does not allow to specify selectedValue		
<b>Description</b>			
The following code from documentation does not work:			
<pre>&lt;f:form.select name="paymentOptions" options="{payPal: 'PayPal International Services', visa: 'VISA Card'}" selectedValue="visa" /&gt;</pre>			
Error:			
PHP Fatal error: Uncaught exception 'Tx_Fluid_Core_Parser_Exception' with message 'Argument "selectedValue" was not registered.' in typo3\sysext\fluid\Classes\Core\Parser\TemplateParser.php:402			

### History

#### #1 - 2009-06-14 01:36 - Christian Müller

- File fluid\_3657.patch added

Well, could you try this patch?

I do not think it will be final, as I am not sure about the value of \$selectedValue in case of nothing selected (first render of form). Hope the check works with === false...

#### #2 - 2009-06-14 01:55 - Marcel Rosenberger

After applying the patch no error is thrown anymore. However the "visa" option is not selected.

A change from

```
if(($selectedValue === false) && $this->arguments->hasArgument('selectedValue') && ($this->arguments['selectedValue'] === (string)$value)){
```

to

```
if(empty($selectedValue) && $this->arguments->hasArgument('selectedValue') && ($this->arguments['selectedValue'] === (string)$value)){
```

should make it working, but has other non wished effect (will always select options with empty or zero value), so the return value of \$selectedValue has to be changed I think.

| *The following code from documentation does not work:*

the documentation is wrong here. All Form view helpers have an argument "value". Could you please try whether this works:

```
<f:form.select name="paymentOptions" options="{paypal: 'PayPal International Services', visa: 'VISA Card'}" value="visa" />
```

btw: have a look at <https://svn.typo3.org/TYPO3v4/CoreProjects/MVC/viewhelpertest/> to see all the existing view helpers in action

#### #5 - 2009-06-22 11:41 - Bastian Waidelich

- Status changed from New to Needs Feedback

#### #6 - 2009-06-22 15:52 - Marcel Rosenberger

With attribute value it's working. I tested:

```
<f:form.select name="paymentOptions" options="{paypal: 'PayPal International Services', visa: 'VISA Card', master: 'MasterCard'}" value="visa" />
```

as well as

```
<f:form.select name="paymentOptions" options="{paypal: 'PayPal International Services', visa: 'VISA Card', master: 'MasterCard'}" value="{0: 'master', 1: 'visa'}" multiple="multiple" />
```

I would like to see the documentation changed inside SelectViewHelper.php accordingly.

#### #7 - 2009-07-22 10:36 - Bastian Waidelich

- Status changed from Needs Feedback to Accepted

- Assigned To set to Bastian Waidelich

#### #8 - 2009-07-31 12:06 - Bastian Waidelich

- Status changed from Accepted to Resolved

Inline documentation has been fixed in r2914

#9 - 2009-10-21 17:53 - Bastian Waidelich

- Project changed from Extbase MVC Framework to TYPO3.Fluid

- Category deleted (432)
