

TYPO3.Flow - Bug # 36632

Status:	Closed	Priority:	Should have
Author:	Rens Admiraal	Category:	Security
Created:	2012-04-26	Assigned To:	Rens Admiraal
Updated:	2012-06-28	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git 1.1			
Subject:	The requestPatterns in AbstractToken has value NULL		
Description			
<p>I just installed a clean distribution of the blog package and for some reason this install throws an error because of the return value in <code>hasRequestPatterns()</code> which returns TRUE when the requestPatterns value is NULL.</p> <p>For this I'll upload a related patch on gerrit. Problem is how the value can be NULL. <code>setRequestPatterns</code> has typehinting for <code>\$requestPatterns</code> being array, and isn't even called somewhere in the code. The property is protected, and has a default value of <code>array()</code>. Besides that: the <code>setRequestPatterns()</code> method is never called.</p>			

History

#1 - 2012-04-26 21:21 - Rens Admiraal

Change is not linked yet, so by hand: <https://review.typo3.org/#/c/10797/>

#2 - 2012-04-26 21:42 - Karsten Dambekalns

- Category set to Security
- Status changed from New to Under Review
- Assigned To set to Rens Admiraal

#3 - 2012-06-28 10:32 - Karsten Dambekalns

- Status changed from Under Review to Closed
- Affected Flow version changed from Git master to Git 1.1

Not really clear what caused this. Seems to have gone!?
