

TYPO3.Flow - Feature # 36696

Status:	Resolved	Priority:	Should have
Author:	Alexander Berl	Category:	Http
Created:	2012-04-29	Assigned To:	Robert Lemke
Updated:	2012-05-30	Due date:	
PHP Version:	5.3		
Has patch:	Yes		
Complexity:	easy		
Subject:	Allow setting response headers from different locations		
Description	<p>As a developer, I want to set response headers from locations different from the current controller invocation for various needs. For example, I want to set the <i>"Vary: Accept-Language"</i> header from a locale detection service, or the <i>"Cache-Control"</i> headers from a caching service.</p> <p>I suggest the RequestHandler should also provide access to the current response object, as it currently does to the HttpRequest object.</p>
