Updated:	2012-05-08	Due date:	
Sprint:			
PHP Version:	5.3		
Has patch:	No		
Complexity:	easy		
Subject:	Catch exceptions in HTTP Browser		
Description			
<p>Currently any exceptions caused by controllers etc. are not caught by the virtual browser. In order to make the behavior of the Browser class more realistic, these should be converted into a string and a 500 status should be set for the response.</p> <p>This affects the InternalRequestEngine only.</p>

[TASK] Handle exceptions in virtual HTTP browser

The virtual HTTP browser now catches any exceptions and returns the exception information in the response rather than letting the actual exception slip through.

Change-Id: I4915343d5eec68f758573353ddbcc273399f2774

Resolves: #36943

Releases: 1.1

History

#1 - 2012-05-08 10:43 - Gerrit Code Review

- Status changed from Accepted to Under Review

Patch set 1 for branch **master** has been pushed to the review server.

It is available at <http://review.typo3.org/11071>

#2 - 2012-05-08 10:43 - Gerrit Code Review

Patch set 2 for branch **master** has been pushed to the review server.

It is available at <http://review.typo3.org/11071>
