TYPO3.Flow - Bug # 36954

Status:	Resolved	**Priority:**	Should have
Author:	Bastian Waidelich	**Category:**	Cli
Created:	2012-05-08	**Assigned To:**	Bastian Waidelich
Updated:	2012-05-09	**Due date:**	

PHP Version:	
Has patch:	No
Complexity:	
Affected Flow version:	Git master
Subject:	Only use ansi colors for var_dump() if supported

Description

\TYPO3\FLOW3\var_dump() currently uses ANSI codes to colorize variables on the CLI.
On Windows that's not supported by default and instead all special characters are outputted.
I don't know how to detect ansi support from PHP, so I would suggest to disable this on Windows for now.
The change is trivial:

```
1$ansiColors = $plaintext;
```

```
1$ansiColors = $plaintext && DIRECTORY_SEPARATOR === '/';
```

[BUGFIX] Only use ansi colors for var_dump() if supported

\TYPO3\FLOW3\var_dump() currently uses ANSI codes to colorize

the output on the CLI.
On Windows that's not supported by default. It renders all special

characters instead.

This change disables ansiColors on Windows.
