TYPO3.Flow - Bug # 37053

Status:	Resolved	**Priority:**	Must have
Author:	Bastian Waidelich	**Category:**	Cli
Created:	2012-05-10	**Assigned To:**	Karsten Dambekalns
Updated:	2012-05-10	**Due date:**	

PHP Version:	
Has patch:	No
Complexity:	
Affected Flow version: Git master	

Subject:	Code migration doesn't work on Windows

Description

I came accross following issues:

   - in Git::isGitAvailable() the system call pipes the output to /**dev**/**null**. This is not supported on Windows
   - in Manager::registerMigrationFiles() the version number taken from the migration filename is casted to an integer which leads to duplicated versions
