Subject:	Workspace preview (FE) shows duplicate records								
Description	<p>When in workspace preview versioned records, which are selected by any relation (except uid or pid) are shown twice: the original record and the versioned record.</p> <p>This is caused by a wrong condition in <code>t3lib_pageSelect::enableFields()</code>: the selection on <code>pid<>-1</code> should only be added if parameter <code>\$noVersionPreview</code> is false. The parameter is only set to true to retrieve version overlays of specific records (see <code>t3lib_pageSelect::getWorkspaceVersionOfRecord()</code>).</p> <p>Steps to reproduce:</p> <ol style="list-style-type: none">1. Install (and configure) EXT:blog_example2. create blog record (live)3. create blog post record (live)4. switch to any workspace5. edit blog post (workspace)6. open preview of page containing "list of blogs" plugin <p>This shows the blog created above containing two blog posts (in workspace frame).</p>
