Subject:	flow3:package:refreeze displays verbose hints of cache:flush		
Description			
With I4db274dcf0376ada53a3a46ed5c6b945543698d1 the typo3.flow3:cache:flush command outputs all frozen packages. This message should be hidden when the cache:flush command is executed from another command (for example flow3:package:refreeze).

[BUGFIX] Package refreeze command is too verbose

flow3:package:refreeze currently displays the output of cache:flush which contains hints about frozen packages.

This change adds a flag \$outputResults to Scripts::executeCommand() that only outputs errors if set to FALSE.

The package commands now set this flag in order to skip output from cache:flush.
