TYPO3.Flow - Bug # 37227

Status:	On Hold	**Priority:**	Must have
Author:	Adrian Föder	**Category:**	Session
Created:	2012-05-16	**Assigned To:**	
Updated:	2012-06-25	**Due date:**	

PHP Version:	5.4
Has patch:	No
Complexity:	
Affected Flow version:	(any)
Subject:	securityContext->getParty is not available in widget context

Description

consider the following scenario:

```
1 class SampleViewHelper extends \TYPO3\Fluid\Core\Widget\AbstractWidgetViewHelper {
2
3     /**
4      * @var bool
5      */
6     protected $ajaxWidget = TRUE;
7
8     /**
9      * @FLOW3\Inject
10      * @var ...\ViewHelpers\Widget\Controller\SampleController
11      */
12     protected $controller;
13
14     /**
15      * @return array
16      */
17     protected function getWidgetConfiguration() {
18         $something = new \AnEntity();
19
20 ...
21
```

and

```
1 class AnEntity {
2
3     /**
4      * @FLOW3\Inject
5      * @var \TYPO3\FLOW3\Security\Context
6      */
7     protected $securityContext;
8
9     /**
10      */
11     public function initializeObject() {
12         $this->securityContext->getParty();
13
14 ...
```

the Session implementation crashes; concretely the following error occurs:

#1: Warning: session_write_close(): Failed to write session data (files). Please verify that the current setting of session.save_path is correct (/var/www/Data/Temporary/Development/Sessions) in /var/www/Data/Temporary/Development/Cache/Code/FLOW3_Object_Classes/TYPO3_FLOW3_Session_PhpSession_Original.php line 3 l.php line 332

History

#1 - 2012-05-16 18:02 - Christian Müller

I couldn't reproduce this in PHP 5.3 seems to be really something with PHP 5.4, more tests are required here.

#2 - 2012-05-25 09:40 - Karsten Dambekalns

- Target version changed from 1.1 to 1.1 RC1

#3 - 2012-06-25 22:14 - Karsten Dambekalns

- Status changed from New to On Hold

- Target version deleted (1.1 RC1)

- Affected Flow version changed from Git master to (any)
