

## TYPO3.Flow - Feature # 3728

<b>Status:</b>	New	<b>Priority:</b>	Should have
<b>Author:</b>	Sebastian Kurfuerst	<b>Category:</b>	MVC
<b>Created:</b>	2009-06-23	<b>Assigned To:</b>	
<b>Updated:</b>	2013-11-16	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Subject:</b>	Support arrays of objects as controller arguments		
<b>Description</b>			
<p>Sometimes, you need to receive a variable number of objects of a given type as argument in the controller.</p> <p>It would be nice to have a syntax like:</p> <pre>/** * @param F3\Blog\Post[] \$posts An array of posts  */ public function changeAction(array \$posts) { // do something with the list of posts here. }</pre> <p>So, the general question is: How do we edit multiple items of the same type (or later, of different types) at the same time?</p> <p>Greets, Sebastian</p>

### History

#### #1 - 2009-07-13 11:25 - Robert Lemke

- Target version deleted (283)

#### #2 - 2009-09-28 12:21 - Karsten Dambekalns

The syntax is set now, it would be `array<F3\Blog\Post>`

#### #3 - 2013-11-16 17:34 - Kay Strobach

isn't that already possible with a wrapper model?
