Updated:	2013-05-21	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Inheritance in ORM should be configured automatically		
Description			
<p>When classes are extended, inheritance should be configured automatically for Doctrine, using sane defaults. This avoids the need to foresee future needs when coding - especially for packages that are of general purpose and where no one can know in the beginning whether they will be extended or not.</p>
