

TYPO3.Flow - Feature # 37376

Status:	Resolved	Priority:	Should have
Author:	Robert Lemke	Category:	Utility

Updated:	2012-05-22	Due date:	
PHP Version:	5.3		
Has patch:	No		
Complexity:	easy		
Subject:	Application-wide time stamp representing "now"		
Description	<p>We should provide an application-wide reference for a time reflecting "now" because:</p> <ul style="list-style-type: none">- code using <code>time()</code> and comparing values with other parts of the application might, in an edge case, end up with different times, although they both mean "now"- testing code which uses <code>time()</code> or <code>new \DateTime()</code> is cumbersome or sometimes not possible

[FEATURE] Introduce "Now" as unique time reference

This patch introduces a new class called "Now" which inherits `DateTime` and has the scope `Singleton`. It can be used in all cases where a reliably comparable value of "now" is needed or where time needs to be mocked in related tests.
