TYPO3.ExtJS - Bug # 37388

Status:	Resolved	**Priority:**	Must have
Author:	Bastian Waidelich	**Category:**	ExtDirect
Created:	2012-05-22	**Assigned To:**	
Updated:	2012-07-13	**Due date:**	
Subject:	RequestHandler uses uninitialized variable "$settings"		

Description

With 7dcc31680e450aa0df47a2f81a65158c223c41ce the lines

$configurationManager = $this->objectManager->get('TYPO3\FLOW3\Configuration\ConfigurationManager');
        $settings =
$configurationManager->getConfiguration(\TYPO3\FLOW3\Configuration\ConfigurationManager::CONFIGURATION_TYPE_SETTINGS, 'T
ETTINGS, 'TYPO3.ExtJS');

have been removed, but not the next line (now 106) referring to the - now uninitialized - variable $settings.

A unit test would be nice ;)

History

#1 - 2012-05-22 11:10 - Karsten Dambekalns

$this->settings does exist, it seems…

#2 - 2012-07-13 16:12 - Karsten Dambekalns

- Status changed from New to Resolved

- % Done changed from 0 to 100
