

TYPO3.Fluid - Bug # 37459

| | | | |
|-------------------------------|--|---------------------|-------------------|
| Status: | Closed | Priority: | Should have |
| Author: | Christopher Hlubek | Category: | ViewHelpers |
| Created: | 2012-05-24 | Assigned To: | Bastian Waidelich |
| Updated: | 2012-05-24 | Due date: | |
| Has patch: | No | | |
| Affected Flow version: | Git master | | |
| Subject: | FormViewHelper with GET method and query parameters in action is not usable | | |
| Description | <p>If the form viewhelper is used with method="GET" and the action attribute that is built (given with actionUri or using the URI builder) contains query paramters, they will be lost on form submission (http://www.w3.org/TR/html401/interact/forms.html#h-17.13.3.4).</p> <p>The form viewhelper should parse query parameters in the action URI and prepend them as hidden fields in the form to pass them to the request that is submitted.</p> | | |
