

## TYPO3.Flow - Bug # 37507

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Carsten Bleicker	<b>Category:</b>	Persistence
<b>Created:</b>	2012-05-26	<b>Assigned To:</b>	Karsten Dambekalns
<b>Updated:</b>	2012-06-28	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b> FLOW3 1.1.0 beta 1			
<b>Subject:</b>	Doctrine Collection add existing		
<b>Description</b>			
<p>If you build up a nested form to UPDATE the party by a given subproperty input &lt;f:form.textfield property="primaryElectronicAddress.identifier" /&gt; this will results in a doctrine exception:</p> <p>#23000: SQLSTATE<sup>23000</sup>: Integrity constraint violation: 1062 Duplicate entry '54513027-6fce-4e4b-972a-8cd394d3ef87-e8dcf75e-b057-4f65-be8c-767' for key 'PRIMARY'</p> <p>in my humble opinion either the doctrine array collection should check for allready existing and dont add a new index. instead of a new it should use the old index. otherwise i have 2 indexes with the same uuid.</p>

Closing as duplicate of #37628. And this is not something that can be solved the Doctrine collections, as they are also used for non-unique collections.
