TYPO3.Flow - Bug # 37509

Status:	Closed	**Priority:**	Should have
Author:	Carsten Bleicker	**Category:**	Validation
Created:	2012-05-26	**Assigned To:**	Karsten Dambekalns
Updated:	2012-07-10	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version:	FLOW3 1.1.0 beta 1		
Subject:	ElectronicAddressValidator validates identifier but setting errors for property ElectronicAddress		
Description			

I would expect, that Property Errors for Identifier will be added.

It validates the identifier of the ElectronicAddress in question. But the property that has an error is of course not the (internal) identifier of the ElectronicAddress, but the property of your model holding the address instance.

I hope I got that right - if not, feel free to reopen.
