

## TYPO3.Flow - Bug # 37542

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Carsten Bleicker	<b>Category:</b>	Validation
<b>Created:</b>	2012-05-28	<b>Assigned To:</b>	Karsten Dambekalns
<b>Updated:</b>	2012-06-28	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b> FLOW3 1.1.0 beta 1			
<b>Subject:</b>	Subproperty Validation (f.e. Party::primaryElectronicAddress / ::electronicAddresses) only Validates DoctrineCollection Models		
<b>Description</b>			
<p>my action updates a party. incoming request arguments also contain the identifier of its primaryElectronicAddress. on first submit of the form the property identifier is validated as email address, correct.  but submitting it again the only addresses in party::electronicAddresses containing errors. primaryElectronicAddress remains empty.  cant figure out where this happens. do you allow the validation of an object and its subproperty only once? if so, how should i get the validation errors for property primaryElectronicAddress::identifier?</p> <p>kind regards carsten</p>
