

## TYPO3.Flow - Bug # 37550

<b>Status:</b>	Resolved	<b>Priority:</b>	Should have
<b>Author:</b>	Pankaj Lele	<b>Category:</b>	Http
<b>Created:</b>	2012-05-28	<b>Assigned To:</b>	Karsten Dambekalns
<b>Updated:</b>	2013-11-18	<b>Due date:</b>	
<b>PHP Version:</b>	5.3		
<b>Has patch:</b>	Yes		
<b>Complexity:</b>			
<b>Affected Flow version:</b>	FLOW3 1.1.0 beta 1		
<b>Subject:</b>	TYPO3.FLOW3.http.baseUri does not work		
<b>Description</b>	<p>Setting TYPO3.FLOW3.http.baseUri to a value e.g. 'http://mywebsite.com/' really have no effect on the &lt;base&gt; tag and the resource links.</p> <p>This baseUri setting is really helpful when FLOW3 is running behind a nginx proxy. So that FLOW3 can be forced to render base tag and resource links with the baseUri of nginx site.</p> <p>Attached patch works very well. But not sure if it's clean approach.</p>

More elegant way by using additionally a HTTP header to override the baseUri. Still the patch cannot be that clean in your eyes. So please add your comments.

Date: Mon Jun 11 17:03:54 2012 +0200

### #4 - 2012-06-13 12:07 - Henrik Møller Rasmussen

- File *patch* added

[BUGFIX] Initialize resources base uri upon request

The resources base uri was set in the object initialization where the settings was not loaded yet. That meant that the TYPO3.FLOW3.http.baseUri setting did not have any effect.

Instead the base uri is detected upon first request. This way the settings are loaded upon first resources base uri detection.
