

## TYPO3.Flow - Bug # 37564

<b>Status:</b>	New	<b>Priority:</b>	Should have
<b>Author:</b>	Carsten Bleicker	<b>Category:</b>	Validation
<b>Created:</b>	2012-05-29	<b>Assigned To:</b>	
<b>Updated:</b>	2012-05-29	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b> FLOW3 1.1.0 beta 1			
<b>Subject:</b>	Validation of Parent Object containing properties of type ManyToOne and ManyToMany to same Target		
<b>Description</b>			
<p>Lets use the person model of the TYPO3.Party package as example.</p> <p>The model contains a property \$primaryElectronicAddress wich is a ManyToOne to ElectronicAddress and also a property \$electronicAddresses wich is a ManyToMany also to ElectronicAddress.</p> <p>In my case i build up a form to update a person. this form also conains a field for property 'primaryElectronicAddress.identifier' to update also the primaryElectronicAddress.</p> <p>If i submit this form with an invalid email, the validation of primaryElectronicAddress::identifier matches and returning errors for the electronicAddress of the ManyToOne AND the ManyToMany cases, anything is fine. If i submit this again, the validation errors only appears for the ManyToMany ElectronicAddress. I cant figure out why this happens, but it happens.</p> <p>Anyone can take a look at this?</p> <p>Kind regards Carsten</p>
