Subject:	Examples for Objects.yaml to change the class are not valid

Description

You can see in documentation: http://flow3.typo3.org/documentation/guide/partiii/objectmanagement.html

Example: Objects.yaml file for object replacement:
    // Change the name of the class which
     // represents the object MyCompany\MyPackage\Greeter
    MyCompany\MyPackage\Greeter:
      className: TYPO3\OtherPackage\GreeterWithCompliments

If you do that you have an exception that className parameter works only with Interfaces (Flow 1.1)
