

TYPO3.Fluid - Bug # 3792

Status:	Closed	Priority:	Should have
Author:	Christopher Hlubek	Category:	ViewHelpers
Created:	2009-06-28	Assigned To:	Christopher Hlubek
Updated:	2010-10-20	Due date:	
Has patch:			
Affected Flow version:			
Subject:	Special tag attributes for form view helpers are missing (e.g. size)		
Description			
Form input elements can have a lot of HTML attributes e.g. for the size or maxlength. These are missing for the TextareViewHelper and TextboxViewHelper. So currently no size can be set for text input fields! Apart from standard attributes, there are also proprietary attribues (e.g. for auto completion), that should be supported.

These are missing [...]*

Note, that all tag based viewhelpers have the argument "additionalAttributes". So you can do

```
<f:form action="foo" additionalAttributes="{target: '_blank', myCustomAttribute: 'freedom'}" />
```

Please close the ticket if that solves your problem.

It solves my problem at first glance, but standard attributes like size for an input element should really be settable directly on the tag. So I think we should add the most used attributes to the form view helpers.

| *standard attributes like size for an input element should really be settable directly on the tag.*

TextViewHelper already has an attribute size!

TextAreaViewHelper knows rows and cols.

| *So I think we should add the most used attributes to the form view helpers.*

Afaik we've already implemented support for all standard attributes (based on <http://w3schools.com/tags/>). Which attributes are you missing?

- *Status changed from New to Closed*

- *% Done changed from 0 to 100*

Apparently the size was added by me already. Then I'll close the ticket.
