

TYPO3.Fluid - Feature # 3793

Status:	Resolved	Priority:	Should have
Author:	Christopher Hlubek	Category:	ViewHelpers
Created:	2009-06-28	Assigned To:	Christopher Hlubek
Updated:	2010-10-20	Due date:	
Has patch:			
Subject:	CSS class for errors in form view helpers		
Description			
Form view helpers should automatically add a CSS class if an error for the property exists. The name of this class should be overridable.

Revision 1ca389ff - 2009-06-30 01:01 - Christopher Hlubek

- [TASK] Fluid (ViewHelpers): Implemented a first version of error marking on form view helpers. Refs #3793

History

#1 - 2009-09-04 20:04 - Bastian Waidelich

This is already implemented, right?

#2 - 2009-09-07 10:23 - Christopher Hlubek

- Status changed from New to Resolved
- % Done changed from 0 to 100

Yes, it's implemented in r2669. The CSS class can be set by the attribute `errorClass`. As a default the class "error" will be used.

Ah, right I remember.

Just for the record: In r2914 the functionality has been moved to the abstract base class and the attribute was added to "Select", "Textearea" and "Upload" form view helpers too.
