TYPO3.Flow - Bug # 37995

Status:	Resolved	**Priority:**	Must have
Author:	Adrian Föder	**Category:**	Cli
Created:	2012-06-13	**Assigned To:**	Adrian Föder
Updated:	2012-06-20	**Due date:**	
PHP Version:			
Has patch:	Yes		
Complexity:			
Affected Flow version: Git 1.2 (master)			
Subject:	Exceptions in CommandController environment are not logged		
Description			

If an exception occurs during a CommandController invokation, the exception isn't logged like users are used to (in Logs/Exeptions/{referencecode}.txt).
That's because the CommandRequestHandler trys/catches/handles any occuring exception on its own and not via the exception handler framework.

Revision f0eaa57a - 2012-06-18 14:28 - Adrian Föder

[BUGFIX] Use exception handling framework for CommandController

The CommandRequestHandler brought its own tiny exception handling
with the main drawback exceptions not being logged anymore, unlike
the Error\AbstractExceptionHandler features.

When handling a CommandRequest, a dedicated CommandExceptionHandler
is involved, taking care of occuring exceptions.

Change-Id: Ibc05c3e88f5f915f4b96a8886d92b8042fc34a58
Fixes: #37995
Releases: 1.1, 1.2
