| **Subject:** | Load extension configuration in function context |
|---|---|
| **Description** | |

Until now all the ext_localconf.php files provided by extensions were included in a global scope.
This is a major blocker for a clean and flexible bootstrapping.

Include the configuration files in a method of the bootstrap class and set all supported global variables as global.

[!!!][TASK] Load extension configuration in function context

Until now all the ext_localconf.php files provided by extensions
were included in a global scope. This is a major blocker for
a clean and flexible bootstrapping.

Include the configuration files in a method of the bootstrap class
and set all supported global variables as global.
