[BUGFIX] Correctly implement validator resolver short notation

Currently, the short notation for validators which has been introduced

with Id807dbfa78ae1388aa8cd53bfc578893eade427c does only support syntax

like TYPO3\FLOW3:EmailAddress; but we should rather support TYPO3.FLOW3:EmailAddress

as this is how we use package keys at all other places which are not PHP code.
