Subject:	't3lib_lock' does not exist if $TYPO3_CONF_VARS['SYS']['systemLog'] = 'file,...'		
Description			

If the systemLog is configured to file ($TYPO3_CONF_VARS['SYS']['systemLog'] = 'file,...'), the workspace-module won't work.

It will only show an error message: "router - class 't3lib_lock' does not exist".

Hi, do you mind pushing the patch to gerrit?

http://wiki.typo3.org/Contribution_Walkthrough_Tutorials

One nitpick for the patch, the comment needs one more tab of indention (always one more than the code).

Is this still reproducible after #36241 is merged in 4.7?

To test please checkout workspaces_4-7 current branch in typo3/sysext/workspaces.

#9 - 2012-06-26 07:21 - Simon Apold

Your right, with the patch in #36241 this issue is not reproducible any more.
It seems, that any other PHP error message or even notice will cause this behaviour.
Should i abandon this change?

#10 - 2012-07-18 20:24 - Wouter Wolters

Can be abandoned:)
