<b>Subject:</b>	IdentityRoutePart should accept __identity array		
<b>Description</b>			
Since #37403 IdentityRoutePart::matchValue() returns an identity array in the format array('__identity' => '<Identifier>'). This format should also be accepted for IdentityRoutePart::resolveValue(). This is required for widgets that fetch the arguments from the current request and pass it to the UriBuilder.

[BUGFIX] IdentityRoutePart should accept identity array

IdentityRoutePart::matchValue() returns an identity array in the format array('\_\_identity' => '<Identifier>') (see #37403).

This change adjusts resolveValue() to accept arrays in that format, too.

This is required for widgets that fetch arguments from the current request and pass them to the UriBuilder.
