| | |
|---|---|
| **PHP Version:** | |
| **Has patch:** | No |
| **Complexity:** | |
| **Affected Flow version:** | FLOW3 1.1.0 rc 1 |
| **Subject:** | Fatal error when performing a core:migrate |
| **Description** | |

When performing a core migrate using 1.1rc1 a fatal error is given:

PHP Fatal error:  Class 'TYPO3\FLOW3\Core\Migrations\Version201206271128' not found in

/......./Packages/Framework/TYPO3.FLOW3/Scripts/Migrations/Manager.php on line 179

It turns out that Packages/Framework/TYPO3.FLOW3/Migrations/Code/Version201206271128.php contains a different classname. Changing the classname solves the issue and migration will succeed.

[BUGFIX] Correct a code migration's class name

A code migration class name didn't match its file name,
this patch corrects this.
