Subject:	TYPO3 6.0: temp_CACHED_* files have been moved to typo3temp/Cache/Code/cache_core		
Description			
<p>For TYPO3 6.0 the temp_CACHED_* files have been moved to the database. See #38414.</p> <ul style="list-style-type: none">- The files can still be removed with the function "Clear configuration cache" at the top right-hand corner of the Backend.- The Install Tool section "Clean up" cannot delete these files. It always shows 0 files in the folder typo3temp/Cache, which is wrong. <p>Check, if a manual mentions these files and update accordingly.</p> <p>And remove information about temp_CACHED_FE* files - they have again been removed.</p>			
Subtasks:			
Task # 50304: temp_CACHED_* files have been moved to typo3temp/Cache/Code/cache_core			Resolved

History

#1 - 2012-06-30 10:12 - Christian Kuhn

It is true that the temp_CACHED_* files in typo3conf/ do not exist anymore. But they are not moved to the database, but to the filebackend cache and now reside in typo3temp/Cache

#2 - 2012-10-21 22:29 - Chris topher

- Subject changed from TYPO3 6.0: temp_CACHED_* files are no longer created to TYPO3 6.0: temp_CACHED_* files have been moved to typo3temp/Cache/Code/cache_core

Ahh, thanks for the clarification! :-)

I found them in typo3temp/Cache/Code/cache_core/.

They are now named something like ext_localconf_42563af3f545....php and ext_tables_42....php.
